

# Mechatronic Engineer

Бажана країна або місто:	Швеція
Заробітна плата:	Від 2000 EUR
Напрям діяльності	It, комп'ютери, інтернет
Графік роботи	Повна зайнятість
Готовий до переїзду	Так

## Опис резюме

Design and maintenance of mechatronic systems and industrial robots.

## Досвід роботи

01.09.2018 – По теперішній час

**Minsk State College of Electronics.**  
**Head of Laboratory of Industrial Electronics**  
Developed several courses on PLC programming (Siemens PLC 1200, 1500), Robotics programming (CIROS 6, Mitsubishi RV-2SDB, RV-2AJ) and Industrial line assembly (Festo MPS), which resulted in changing the existing mechatronics course toward more PLC and robotics oriented, and expanding the list of possible job opportunities for students. ● Taught courses on Robotics Programming on customer demand. ● Did programming of Mitsubishi`s robots on customer demand. ● Programmed Human Machine Interfaces for industrial customers on demand. ● Put new equipment into operation, which expanded the list of taught specialties in the college. ● Participated in recruiting of students for college and their further development for the next WORLDSKILLS as a Judge.
