

Mechatronic Engineer

Бажана країна або місто: Швеція
Заробітна плата: Від 2000 EUR
Напрямок діяльності: ІТ, комп'ютери, інтернет
Графік роботи: Повна зайнятість
Готовий до переїзду: Так

Опис резюме

Design and maintenance of mechatronic systems and industrial robots.

Досвід роботи

01.09.2018 – По теперішній час

Minsk State College of Electronics.

Head of Laboratory of Industrial Electronics

Developed several courses on PLC programming (Siemens PLC 1200, 1500), Robotics programming (CIROS 6, Mitsubishi RV-2SDB, RV-2AJ) and Industrial line assembly (Festo MPS), which resulted in changing the existing mechatronics course toward more PLC and robotics oriented, and expanding the list of possible job opportunities for students. • Taught courses on Robotics Programming on customer demand. • Did programming of Mitsubishi`s robots on customer demand. • Programmed Human Machine Interfaces for industrial customers on demand. • Put new equipment into operation, which expanded the list of taught specialties in the college. • Participated in recruiting of students for college and their further development for the next WORLDSKILLS as a Judge.
